

ICS™-550SE

Next Generation Survey for
Next Generation Networks

ICS-550SE Provides A Comprehensive Advanced Network Characterization in a Single Chassis.

ICS-550SE is an advanced network characterization tool that surveys the cellular and WiFi environment and records the metadata of detected control channels and the information therein. These completely passive measurements are obtained without handshaking or any additional interfacing with the communications network.

ICS-550SE provides its users with state-of-the-art survey solutions that support the new 5G NR technologies. This product has been designed to support the evolution of both 5G non-standalone (NSA) and standalone (SA) networks. ICS-550 is capable of surveying the new mmWave frequency bands allocated for 5G NR networks while simultaneously scanning sub 6 GHz frequencies. Additionally the ICS-550SE passively surveys the WiFi environment to include WiFi 6E. QRC will continue to develop new features to support 5G NR surveying as technologies advance.

The DCode Pro software is the user's primary interface when taking control of the ICS-550SE system, viewing real time notifications, managing data, and conducting advanced signal analysis.

Geofencing is a data file management tool that allows the user to create pre-defined geographic boundaries where the ICS will collect data. It is a must-have feature for long range UAS air surveys.

Spectrum Viewer is a single intuitive display that presents a RF spectral display and identifies various cellular modulation types, signals, and interferences.

Band Editor is an advanced feature that allows the user to identify spectrum considered out-of-band for known standards based Band Classes. This feature is critical to fully understanding the availability of commercial communications in developing nations.

Rogue Cell Detection alerts the user to the possibility of a rogue cell operating in the survey area. DCode passively detects these devices and assigns a confidence score to each discovery.

Passive Basestation Location (PBL) provides the geographic positions of cellular sectors from ground or airborne surveys.

WiFi Supports 2.4, 5 and 6 GHz WiFi

This item is subject to the EAR. Accordingly, an export authorization may be required for certain clients, uses, and/or destinations. The time required to obtain an authorization may impact international delivery.

Integrated Collection System (ICS) running
DCode Pro Software

Features

- Enhanced Carrier Discovery
- Fully autonomous collection
- Remote interface
- Complete decoding of control channel messages
- Self-Configuring
- Active tool configuration
- L3 logging and parsing
- Provider filtering
- Capable of surveying both fixed wireless access (FWA) and mobile access
- Windows 10 embedded operating system
- Internal GPS

Operational Configurations

- 5G NR
 - 5GHz
 - 6GHz
- LTE
- WCDMA
- GSM
- CDMA
- EVDO
- WiMAX
- Wi-Fi (802.11 a/b/g/n/ac/ax)

Technical Data: ICS-550

Size (W x H x D)	6.4" x 5.2" x 7.9"
Weight	8.0 Lbs.
Communications Links	Wi-Fi, Ethernet
External Power Input	10.0 - 32.0 VDC
Operating Temperature Range	0 to +50 °C (+32 to +122 °F) (Without Condensation)
Storage Temperature Range	-20 to +76 °C (-4 to +169 °F) (Without Condensation)
Frequency Range	350 MHz to 6 GHz and 24 GHz to 44 GHz
Supplied Power Adapter	Automobile Power Plug (12VDC Nominal)
Thermal Management	Conduction

WCDMA (3GPP 25.101 v9.10)

Band Class I -	2100 MHz (IMT-2000)
Band Class II -	1900 (PCS)
Band Class III -	1800 (DCS)
Band Class IV -	AWS-1
Band Class V -	800 MHz (American Cellular)
Band Class VI -	Japanese 800
Band Class VII -	UMTS 2600
Band Class VIII -	European 900 MHz
Band Class IX -	Japanese 1800
Band Class X -	AWS-2
Band Class XIX -	Japanese Extended 800 MHz
Band Class XI -	Japanese 1500 MHz

GSM Support (3GPP 45.005 v9.00)

T-GSM 380 -	380 MHz
T-GSM 410 -	410 MHz
GSM 450 -	450 MHz
GSM 480 -	480 MHz
GSM 710 -	710 MHz
GSM 750 -	750 MHz
GSM 810 -	810 MHz
GSM 850 -	800 MHz (American Cellular)
P-GSM 900 -	900 MHz (European)
E-GSM 900 -	900 MHz (European)
R-GSM 900 -	900 MHz (European)
GSM 1800 -	1800 MHz (DCS)
GSM 1900 -	1900 MHz (PCS)

Note: All band classes supported, but may not be enabled, please contact QRC for further information

WiFi

802.11 a/b/g/n/ac
802.11 ax 2.4 and 5 GHz
802.11 ax 6GHz

LTE Support (3GPP TS 36.101 v10.3.0)

Band Class 1 -	2100 MHz (IMT)
Band Class 2 -	1900 MHz (PCS)
Band Class 3 -	1800 MHz (DCS)
Band Class 4 -	AWS-1
Band Class 5 -	850 MHz (CELL)
Band Class 6 -	UMTS Only
Band Class 7 -	2600 MHz (IMT-E)
Band Class 8 -	900 MHz (E-GSM)
Band Class 9 -	1800 MHz (JDCS)
Band Class 10 -	AWS 3
Band Class 11 -	1500 MHz Lower PDC
Band Class 12 -	700 SMH (Lower Block A/B/C)
Band Class 13 -	700 SMH (Upper Block C)
Band Class 14 -	700 SMH (Upper Block D)
Band Class 17 -	700 SMH (Lower Block B/C)
Band Class 18 -	800 MHz Lower (Japan)
Band Class 19 -	800 MHz Upper (Japan)
Band Class 20 -	800 MHz EU DD
Band Class 21 -	1500 MHz Upper PDC
Band Class 22 -	3500 MHz
Band Class 23 -	2000 MHz S-Band (AWS-4)
Band Class 24 -	1600 MHz L-Band
Band Class 25 -	1900 MHz+ (Extended PCS)
Band Class 26 -	850 MHz+ (Extended Cell)
Band Class 27 -	850 MHz+ SMR
Band Class 28 -	800 MHz SMR (APAC)
Band Class 29 -	700 SMH (Lower D/E)
Band Class 30 -	2300 MHz (WCS Block A/B)
Band Class 31 -	450 MHz
Band Class 32 -	L Band
Band Class 33 -	Pre-IMT
Band Class 34 -	2100 MHz (IMT)
Band Class 35 -	1900 MHz (PCS Uplink)
Band Class 36 -	1900 MHz (PCS Downlink)
Band Class 37 -	1900 MHz (PCS Duplex Spacing)
Band Class 38 -	2600 MHz (IMT-E Duplex Spacing)
Band Class 39 -	1900 MHz (DCS-IMT Gap)
Band Class 40 -	2300 MHz TDD
Band Class 41 -	2500 MHz BRS/EBS TDD
Band Class 42 -	3500 MHz TDD
Band Class 43 -	3700 MHz TDD
Band Class 44 -	700 MHz APT TDD
Band Class 66 -	AWS Blocks A-J
Band Class 71 -	US Digital Television

5G LTE Support

Band	Duplex Mode	Freq (MHz)	Common Name
n1	FDD	2100	IMT
n2	FDD	1900	PCS
n3	FDD	1800	DCS
n5	FDD	850	CLR
n7	FDD	2600	IMT-E
n8	FDD	900	Extended GSM
n12	FDD	700	Lower SMH
n14	FDD	700	Upper SMH
n18	FDD	850	Lower 800 (Japan)
n20	FDD	800	Digital Dividend (EU)
